**PLAYING WITH A FULL DECK!!!**  
**Ebbtide Introduces Campione 210 Dual Console Fun Cruiser**

**White Bluff, TN (August, 2002)** - For those who crave the performance of a bow rider but require the roominess of a deck boat, Ebbtide introduces the new **Campione 210 Dual Console Fun Cruiser**. The new Campione 210 Fun Cruiser offers the same style and elegance as all Ebbtide boats as well as performance and versatility.

The stylish bow of the **210 Dual Console Fun Cruiser** is separated by a curved tempered glass windshield, giving it the appearance of an attractive bow rider. The easily accessible bow quickly converts into a sun lounge for a lazy afternoon on the water. The **210 Dual Console Fun Cruiser** stretches 20' feet 10" in length and has an 8'6" beam. It is capable of seating 10 people comfortably so entertaining your guests is a breeze!

The interior of the boat is loaded with many amenities, including storage space for a fun day at sea. The 210 Fun Cruiser features a deluxe AM/FM stereo and CD player. In addition, the bow of the boat contains a built-in insulated cooler with drain; rod storage; large bow platform with non-skid; rear platform with non-skid; enclosed head with port-o-potty; two boarding ladders - bow and stern; ski and knee board storage in floor; rear, side, and bow entrances; and comfortable seating front and rear. This Fun Cruiser's convenience, function, and space make it perfect for a day or weekend of fishing, skiing, wakeboarding, tubing, cruising, or family outings.

For those fishermen out there, this model offers an optional fishing package. This package includes two casting chairs and two pedestals, two stainless steel bases, trolling motor plug and harness, a circular aerated livewell with pump, and extra battery tray. When using the trolling motor plug, the dual battery switch ensures that the battery will not be drained. This feature allows one battery to switch to the other without losing valuable energy.

As with all Ebbtide Boats, each hull and deck is 100% hand laid with a first layup of fiberglass mat and Ashland AME 5000 resin and then successive layers of fiberglass mat and roving using Ashland low VOC resin for lighter and stronger construction. In addition, Ebbtide makes a conscious effort to use materials that are environmentally friendly. Because of the time and care put into each and every boat, only a limited number of boats are produced each year.
